

The antivirus application provided by ITSC could not be installed without connecting on campus network (YNU Wi-Fi or wired LAN) in the past, but now it can be installed at home as COVID-19 compatible.

Important

Depending on devices, the installation process takes about 30 minutes to 1 hour. The installation work should be carried out after finished classes of the day.

Note

- **1.** If you already have a paid antivirus app installed, you can use it as it is. (No Security Agent installation required)
- **2.** If you have an antivirus app, such as a trial version, you'll need to uninstall it and restart your PC.
- **3.** If our previously provided **the Virus Buster Corporate Edition** is installed, it must be **uninstalled in advance**, rather than an override installation.
- 4. Packages for Mac or Android cannot be provided.

Pre-installation

Checking Your Version of Windows 10:
 Open the Settings app, and then head to System > About.

← Settings	- 0	×
命 Home	About	
Find a setting	See details in windows security
